## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed March 4, 2004 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because there are no blank spaces next to each citation for the examiner's initials when the examiner considers the cited documents and it is merely a copy of the PTO-1449 from U.S. Application No. 10/347,567, which will confuse the record. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 4-8, 10-12, 14, 16 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Haim et al.

Haim et al discloses an apparatus and method for positioning a medical apparatus within a patient, note specifically catheter 20 and pressure transducers 36.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Haim et al.

Haim et al discloses all the method steps as claimed except for wherein step (c) is aided by the use of the x-ray fluoroscopy. Note page 1, paragraph [0003] of the instant application, where it discloses that such a step is well known in the treatment of cardiovascular disease. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use x-ray fluoroscopy with the apparatus of Haim et al to aid the step of manipulating the access tool since such use of x-ray fluoroscopy is a well known popular mode of visualization of the catheter as it moves within the body.

***Allowable Subject Matter***

6. Claims 9, 13 and 18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. . Lippe et al and Thompson et al show devices with pressure transducers for treating selected patient tissue or organ regions.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is 571-272-4899. The examiner can normally be reached on 7:00-5:00; M, Tu, W and Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
